

# CEWELD SA P-24

TYPE	Vacume melted, medium alloyed, Creep resistant alloy for sub arc welding.
ANWENDUNGEN	High temperature and creep resistant boilers, pipe work etc..
EIGENSCHAFTEN	Remarkable creep resistant micro alloy controlled alloy developed to offer high strenght and creep resistant properties at elevated temperatures. Combined with flux FL 155 excelent slag release will be obtained in single and multirun application, the neutral action of the flux offers reliable chemical annalysys to ensure the best possible creep properties.
KLASSIFIKATION	
GEEIGNET FÜR	Creep resistant steels , 7CrMoVTiB, P24/T24, ASTM A213, pipe steel, P24/T24, ASTM A213
ZULASSUNGEN	
SCHWEISSPOSITIONEN	
(%)	
MECHANISCHE GÜTEWERTE	
RÜCKTROCKNUNG	Not required
GAS ACC. EN ISO 14175
