

CEWELD SPA 725

| | |
|-----------------------|--|
| TYPE | High-alloyed tubular wire based on a CCrMoNb alloy for thermal spray. |
| ANWENDUNGEN | Applications that require Corrosion resistance in combination with high temperature and extreme wear. |
| EIGENSCHAFTEN | High wear resistance with complex carbide structure. The deposit gives a extreme high hardness and is suitable for corrosion protection, homogeneous particle distribution. The spray deposit is only machinable by grinding with diamond tools. |
| KLASSIFIKATION | |
| GEEIGNET FÜR | Cement industry, pumps, mixer blades, valves seals, bearings, magnetic sensors, dimensional restoration. |
| ZULASSUNGEN | |
| SCHWEISSPOSITIONEN | |
| (%) | |
| MECHANISCHE GÜTEWERTE | |
| RÜCKTROCKNUNG | Not required |
| GAS ACC. EN ISO 14175 | |
