

CEWELD Alloy C-2000

TYPE NiCrMo based Mig welding wire for Hastelloy C2000

APPLICATIONS CEWELD® Alloy C-2000 (UNS N06200) is unique among the versatile nickel-chromium-molybdenum

materials in having a deliberate copper addition

PROPERTIES Like other nickel alloys, it is ductile, easy to form and weld, and possesses exceptional resistance to

stress corrosion cracking in chloride-bearing solutions (a form of degradation to which the austenitic stainless steels are prone). It is able to withstand a wide range of oxidizing and non-oxidizing chemicals, and exhibits outstanding resistance to pitting and crevice attack in the presence

of chlorides and other halides.
