

CEWELD OA Mn14

TYPE Self-shielded and slag forming flux-cored wire for gas-shielded welding

APPLICATIONS Welding parts of manganesesteel that are exposed to impact and shock-like wear

PROPERTIES Austenitic deposit with strain hardening properties and no limits in the number of layers. The

deposit is non magnetic and can not be flame cut.

Hardness HB: After workhardening: 450HB

CLASSIFICATION EN ISO 14700: T Fe9

DIN 8555: MF 7-GF-250-KNP

SUITABLE FOR Rebuilding, buffer layers before hardfacing on steels with high carbon content, heavy impact loads,

manganese steels
