

CEWELD E DUR 1U

TYPE	Cobalt-based thermo shock resistant alloy for overlay applications.(Stelitte 1, CoCr-C, E Co3)						
APPLICATIONS	CEWELD® E DUR 1U is typically used for cutting tools that need to withstand abrasion, heat and corrosion. Examples of uses include: Industrial knives for cutting carpets, plastics, paper, synthetic fibers and saw tips in the wood industry						
PROPERTIES	CEWELD® E DUR 1U has excellent properties against severe abrasion, erosion and corrosion in high temperature environments (900 °C). This electrode is also ideal for applications that are subject to high friction.						
CLASSIFICATION	AWS EN ISO DIN F-nr	147	13: E CoCr-C 00: E Co3 5: E 20-UM-55-CTZ				
SUITABLE FOR	53-55 HRc, Stellite 1 alloy with high resistance to abrasion, oxidation and erosion, metal to metal friction and wear, heat resistant, high hardness at high temperatures, completely tempering resistant
