

CEWELD DUR 6 Tig

TYPE Cobalt-based thermo shock resistant alloy for overlay applications. (Stellite 6)

APPLICATIONS Steam-valves, high temperature liquid pumps, hot cutting tools, exhaust valves.

PROPERTIES Outstanding alloy against abrasion, thermo-shock and corrosion combined with high temperatures.

The weld deposit can be machined with tungsten tool tips and by grinding. The hardness of the weld deposit will degrees 16% at 300° C and about 30% at 600° C. The weld deposit is high heat resistant

up to 900° C. DUR 6 offers a low coefficient of friction of 0.12 and exceptional resistance to galling. It has cavitation-erosion resistance ten times that of 304 stainless steel, DUR 6 can be used

 $to\ protect\ bearing\ surfaces\ in\ non-lubricating\ conditions\ due\ to\ its\ resistance\ to\ metal-to-metal$

wear.

CLASSIFICATION AWS A 5.21: ERCoCr-A

EN ISO 14700: S Co2

F-nr 71

SUITABLE FOR Stellite 6 alloy for, Steam-valves, high temperature liquid pumps, hot cutting tools, exhaust valves

and seats
