

CEWELD E NiCrMo C4

TYPE Nickel based electrode for NiCrMo C4 welding

APPLICATIONS CEWELD E NiCrMo C4 is used for welding nickel-chromium-molybdenum alloy, for welding of the

clad side of joints in steel clad with nickel-chromium-molybdenum alloy, and for joining nickel-

chromium-molybdenum alloys to steel and to other nickel-base alloys

PROPERTIES Due to the combination of chromium with high molybdenum content receives CEWELD E NiCrMo C4

exceptional resistance to a variety of chemical media such as contaminated, reducing mineral acids,

chlorides and organic as well as inorganic chloride contaminated media.

CLASSIFICATION AWS A 5.11: E NiCrMo-7

EN ISO 14172: E Ni 6455

F-nr 43 FM 6

SUITABLE FOR Alloy C4

ASTM B574, B575, B619, B622, B626

UNS N06455
